

FREE RACE Veterinary Point of Care Ultrasound Virtual Webinar Series

FUJIFILM
Value from Innovation
SONOSITE

Join Dr. Soren' Boysen and Dr. Serge Chalhoub of the University of Calgary, for this interactive 4-part series on point of care ultrasound. Attendees will learn how to assess patients in an urgent care situation within minutes using ultrasound.

Through an engaging approach, and a bit of debate, this Internist and Criticalist illustrate how knowing which binary questions to ask, guided by ultrasound, can lead to a more rapid diagnosis, stabilization and treatment plan, increasing the chances of a successful patient outcome.

This series is provided at no cost for DVMs and technicians. RACE credit will be offered. Sessions will be recorded for later viewing if you cannot attend live.

All sessions held via Zoom at 7:30 pm ET.

**Session 1 - March 4
Session 2 - March 11
Session 3 - March 18
Session 4 - March 25**
